

Sammy's Friends
Foundation

September 19th:

From 5:30 to 9pm at
Kensington Rd, Madison, NJ

We are having our 4th annual fundraiser! Please join us for a night of outdoor movie, popcorn, cotton candy, and lemonade, WHILE raising money to help more families to pay for their special children's therapy expenses!

SFF News:

We welcome our new board member,
AnnaMaria Goldsack!
Thank you for agreeing to help out- we are so glad you are on board!

Great News:

As of April 29th, 2015, Sammy's Friends Foundation has gained 501C status as private charity. We are also in the process of making online donation possible on our website- watch the space!

Thank you, St. Vincent Church at Madison!

This year on July 18th, SFF founder Yichien Su invited to talk to a group of children on what SFF

was
of
does

to help children with special

needs. This is SFF second summer appearance at St. Vincent Vocational Bible School. The children had helped raised money, said prayers, and donated books and blankets to support SFF's cause. One of our board members, Mary Ann Palladino, is instrumental in introducing SFF to the children and helped organize their effort. Denise Stefanelli, the Church's Bible school coordinator, has been wonderfully supportive.

Words cannot describe the joy to see children thinking, and helping other children and their family in this era where sometimes everything feels so distant.

Here: snapshot of children's prayer for SFF coupon recipients!

Recent Therapy Coupon Recipients:

Antony S.

Troy J.

Brody K.

SFF started with one family's struggle to provide the best possible developmental therapies and the tragedy of losing their beloved little boy:

Current SFF participating therapy facilities:

www.novogrow.com

Novogrow provides specialized physical therapy for those with multiple and frequently moderate to severe disabilities.

www.specialstrides.com

Special Strides provides Physical and Occupational therapy on horse backs (aka: hippo therapy).

www.njpfa.com

NJPFA offers specialized feeding, swallowing, and speech therapies to children neuromuscular involvements.
